DETAILED ACTION

Reasons for Allowance

Claims 13, 18 and 25 are allowed. The following is the examiner's statement for allowance" The prior art does not disclose or suggest the following:

"...a first connection bracket having an upright portion is secured to the end face of the battery case; a connection plate that makes surface contact with the upright portion of the first connection bracket and that is partially connected to the circuit substrate is arranged on the inner side of one side wall of the end case; and the up right portion and the connection plate are welded together through an aperture formed in one side of the end case opposite the upright portion" in combination with the remaining limitations of independent claims 13, 18 and 25. Dependant claims 14, 16-17, 19-21, 23-24, 26-27 and 29-30 are allowable for the same reason.

The examiner found TAKESHITA (US 2005/0112415 A1) and EHARA (US 2002/0142195 A1) to be the closest prior art to the claimed invention. TAKESHITA discloses a battery pack comprising: a first connection bracket having a portion secured to the end face of the battery case; a connection plate that makes surface contact with the portion of the first connection bracket and that is partially connected to the circuit substrate is arranged on the inner side of one side wall of the end case (see Fig.2, Items#45, 45a disclose a first connection bracket with a portion that is connected that is secured to the end case [5] and having portion that makes connection with a connection plate [44] which makes contact with the circuit substrate and arranged on the inner side of the side wall of the inner case [5]).

Art Unit: 2858

EHARA discloses a battery pack comprising an end case comprising welding holes on the surface of the end case for welding. However neither reference nor their combination suggests the welding apertures be formed in one side of the end case opposite the upright portion, further the combination of TAKESHITA and EHARA would now provide access to the brackets [45a and 44, See TAKESHITA, Fig.20] and it would not have been obvious to one of ordinary skill in the art at the time of the invention to modify any of the references in view of the other or any other additional references such to welding holes in a position to allow access to brackets disclosed by TAKESHITA for welding.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
